Passive - Molina's Gift This Nana is the most unique passive, still alive when she suffers fatal damage. He turns into a cute little rabbit for 2 seconds, during this time. Nana is immune to all damage and the speed of movement gradually increases by 70%. Cool Down for this passive is 120 seconds and CD reduction elements do not work for its Passive. Skill 1 - Magic Boomerang (AoE) CD – 5.5/5.2/4.9/4.6/4.3/4.0 Nana throws him to Boomerang in the designated area and slows down 40% enemies for 1 second while he deals 200/220/240/260/280/300 magic damage. The first enemy takes full damage, but by the next 60%, it will suffer 20% less damage. Skill 2 – Molina Smooch (CC, Summon) CD – 14.5/14/13.5/13/12.5/12 Calls Nana Molina to the designated area. After a short delay, Molina converts the enemy to 1.5 seconds, while 250/275/300/325/350/375 bruises and slows them down by 50/54%/58%/62%/66%/70%. Magic defense is reduced by 25% for the enemy unit. After Molina locks on to a target, he can be dodged if another enemy player willingly stands in front of the target. Skill 3 - Molina Blitz (Burst, CC) CD - 36/32/28 Nana deals Domain damage three times with this skill. Each attack slows down the enemy by 50% for 2 seconds, while 400/540/680 gives magic damage. If this force hits one enemy twice, the enemy is stunned for 1 second. Upgrade to the first and maximum level of Skill Up Methods for Nana Unlock Skill 1. Nana is no exception, making her a professional on the battlefield with great magical abilities. He matches his rodent-like friend Modina with other heroes in DawnLand. He is a strong ally with supporting skills that make him an asset to any team. When the match began, players were trying to find Nana with her other teammates. He can lane and ganking or join big team fights as he makes his way towards enemy base and a strong victory. Nana really is a. Pack magic bundle of energy like a little cat. Create Emblems Items Nana will find advantage with items that make her magical and more powerful in defense. Furthermore, the gear that helps him use his skills more often will compensate him for the weak crime, as it offers coolness reduction and mana regeneration. Therefore, it is easy to build since Nana offers these benefits to many items. Support Mage Enchanted TalismanGlowing WandLightning TruncheonMagic ShoesBlood WingsFleeting Wings Enchanted Talisman mana regeneration and cooling reduction and help with an increase in magic power and HP. This will allow Nana to use her skills more often and avoid an easy death. The Glowing Wand significantly increases magic power while increasing health and speed of movement. It also gives an extra burn power for each skill, increasing damage over time. This can add an extra biting edge that already takes the opponent down on top of powerful attacks. With the benefits of increasing mana and reducing cooling time, Lightning Truncheon is already a powerful part of the gear for Nana. On top of that, the item also increases its magic damage, even allowing it to damage multiple enemies at the same time as its variety of skills. Motion gear magic shoes will increase the speed of movement of Nana and help reduce cooling to be fast to attack and escape. Blood Wings give you health and magical power. They also offer Nana a unique ability to regain her health every time she uses her magical power. Short-term time increases damage from magical attacks and reduces nana's cooling down to make her power center skills even more aggressive. Many items can meet Nana's needs depending on the style of play and which heroes are on the battlefield. It's a priority to pay attention to the way Nana plays to improve her effectiveness. Skill passive skill: Modinas Gift modina's gift is passive skill with Nana. Upon death, Nana can transform her into a smaller, more animal-like version, allowing her to escape the war. He gains a support at speed and while in this form the enemy attack is inexperienced. Before he returns, he will restore a small portion of his health. During this short period of time Nana cannot use her abilities, but she can avoid being killed. Skill 1: Magic Boomerang magic boomerang carries Nana and is an object that it uses for the first skill. He throws it directly into a line from him, flies from there and returns to it, hurting everyone he hits on the road. After the first target, each enemy who touches the boomerang receives speed debuff and reduced damage for each affected target. Skill 2: Molina's Smooch Nana is a transformative spell of small rodent-like animal Molina castings in the second skill. Molina's Smooch chases the creature past any enemy in range and places it in a special area where it resembles Molina. He can stay at the casting site for a short time until he sees a competitor or until expires. If he sees a target, he will lock and chase them until they catch them, transform the hero and make them weaker defensively, slow them down and hurt them in impact. Skill 3: Molina's Blitz molina's Blitz Nana is the ultimate skill in strength. This calls on Molina once again, attacking in a straight line three times with large footprints, and each attack does extensive damage. Any enemy within the attack area will slow down, and if an enemy is shot twice, they are briefly stunned. Nana Bilgi Nana is an easier hero to master with intensely strong skills that make her ideal in a partnership or group environment. His weaknesses come from his low defensive and attacking abilities, but this is easily buffered by his skill set. Although soft, he has a manoeuvre that allows him to escape death, and despite the weak crimes, he has incredibly powerful magical attacks. He is a pair of powerful allies and better equipped for this scenario than taking the strip alone. Therefore, it can be with a partner in the lanes, in the forest, or roaming the area to help the team. In group battles he can be a great presence with his feisty cat attacks. As a partial support hero, the game will begin with a partner in Nana. Choosing a laning partner to start with will be her best bet as she tries to level her skills and get available. After a short time, you can start jungling if necessary or continue to focus on the lanes. As bigger fights begin to break out, this is Nana's signal to start navigating the battlefield and support her teammates. The more products Nana buys, the more talented she will be, thereby bringing her team closer to the finish. In doing so, Nana should pay attention to the map to make sure that her skill set is not required elsewhere. Nana is making it easier for her allies to overthrow the towers and destroy the enemy team. With his heavy abilities, if he can avoid death and stay on the battlefield as long as possible, his team can expect damaging, magical attacks for victory. Victory.
