Inspired by Asian Lover famous for their MMO games, the game developer releases another hit with slow game AMERICA's brilliant style and unique game play. The Sword of Shadows is a Martial Arts MMO for Android. It contains beautiful 3D graphics as well as fast dynamic fighter. Make your role by choosing to join one of the five schools, each with their own fight style and as needed. Are you feeling the pressure of war now? Nothing to fear because our shadow suggestions will take you on a path to become a legendary martial artist, a sword list, tricks and cheats! 1. The Quests are your bread and butter high your level, the stronger you are. The good thing about this game is that there is an easy way of leveling and that is through completing the qqsts. This game does not have a steady flow of queues to be completed from various NPCs. If it's mostly involved in walking around and talking to people, then you just need to be patient like that. If you don't really like to make money, the game itself can happen automatically, you can only talk about it to the game. Remember to check back on the game just from time if you need to have a nall on something. 2. Cross the most mobile matos give you a set of skills of normal basic attack plus you whenever they are available. Most of the same for this game during the level before. After completing specific quests, however, you will have access to defense and break skills. This two skills will make the fight system in this game more dynamic as you need to use these two skills effectively to have better awareness of what's going on in the game. Defensive skills allow you to reduce the damage to come. If finished correctly, it can also prevent damage from enemy skills. You find that this skill is active when you see the Blue Shield icon on the head of your character. On the other hand, brake skills are the opposite of defensive skills. The name shows, it breaks your enemy's defense. If you see the blue shield icon on an enemy, use the break skills and it will sash the shield which signals your chance for an attack. 3. As your development in the game will time for meat, you will feel that your base level is not enough to ensure an increased victory. Good news you can strengthen your character attributes to improve which there are many different ways. The first way to strengthen your character is better gear. You can use your existing equipment through the stone you receive from your qqsts. Your level number is limited you don't forget to upgrade your gear after every level that's been made by your level. The other way is to boost your fighting skills. Cultivating silver and cultivation points need a tribute. It takes a while to complete the process so make sure you always have a skill that you have organized to make the time more and more. Third option to get better Your role is to improve your internal skills. Different schools have different passive skills that give you advantage in war. The process of improving their skills are the same as war skills. You just need to make sure that the skill is always cultivated and you will be able to see strong roles at some time. 4. Welcome to donate you do not ignore the female of the emma. Always donate to the school you're selected. This will help your character to gain better fame in school and, as a result, will increase better than school. You can only donate to your school once a day so make sure you don't remember one day to extend you as soon as possible. 5. Free stuff you should not ignore is claiming multiple scams available in another get game. There are several event sives located in the top right area of the screen. A red fly mark on an event icon indicates that a freebie is available for claim. Check them out of time to make sure you don't miss any rewards. Events include new gifts, bonuses, daily logins, and more. Start on your journey to become a martial arts-based- and martial arts-based- based on our sword of shadow strategy guide! (19 votes, average: 3.47/5) Loading... Shadow Sword is a martial arts MMO for mobile devices and is set in the age of the Vishwa universe, to bring pc game into mobile. Finally, if you are playing the shadow sword and wish to help other users, feel free to sign up and start co-operation! Shadow Shadow Overview sword is a game in which the slow game is developed by USA Corporate. And continue on iOS. The Sword of Shadows is a sorcerer MMO action game in which martial arts is located around. The ancient world of Jianhgu is threatened by the arrival of black armies, and now it is up to you to take weapons. Create a character and select from five different schools of martial arts, each with their own set of talents and attacks. The sword of shadows is also a liquid brilliant game because it is running on a new engine from the slow game. But enough conversation – let's get started with our sword of shadows cheats, tips and technex strategy guide! The shadow sword is a pretty wide game so there is a lot to cover here, but since a lot of games will automatically keep in the important parts, so here is our sword of shadow tips and tricks guide. 1. Keep the quests complete! Shadow Sword is a game that you have separated and do your own things, because the game is a lot of games automatic. Looking for a good majority of games you are running back and forward between the gours, and thankfully it's very easy. Just tap the quest window on the left side of the screen and your character will automatically move to Quest-Govers and Objectives. The only time you need to tap on the screen is to proceed through conversations, but after that your character will automatically resume the journey. 2. Use your defense and break skills! The fight in the shadow sword is very directly ahead. Use your manifest skills when they are away from Cooldaun and use their basic kumbo attack Simple stuff, okay? Then it gets a little challenging. Once you've completed a specific quest, you'll start opening up additional moves for your role. Two important moves are your defense and break skills. Your defensive skills keeps your character in a defensive stance with a blue slope on their head. If you are being killed during this, you will automatically fight the attack! It is also better that you can use it against enemy manifest skills (skills with red target zones). Your other important skill is your break skills. If you feel that your enemy is trying to defend against what you have to do and your attacks, use your break skills. If it is successfully linked, a break skill will sash an enemy guard leaving them at risk of counter-attack. When it is blue on top of their head brakes in half and changes the yellow colour. This is your chance! 3. Strengthen your character! Just by doing the main questline, you should have enough silver and material to power your character. It's not complicated for power, you just need to be sure that you stay with it. Establish allows you to increase the data on your individual gear pieces. You will need stones to do this but you will end up with a ton of their search rewards. You can only take your role to the maximum level, so make sure to redo you at the level all the time. Martial arts is your fighting skills. To improve them, you will need to cultivate. To cultivate, you need silver and properly cultivated points. Like established stones, you'll have a group of them so you're sure your cultivation is in line. When you promote skills, it's not immediately better. You need to wait a specific time. Internal skill grant increases you passive state. In terms of the school you select, you will find a different set of enhances. Indoor expertise works just like martial arts, so make sure you always have your current school cultivation. As a side note, your role position in the top left corner of the screen is a small blue and red button on top of the bars. By tapping on it you will be displaying your rows for martial arts and interior skills, making it really easy to add more things to this queue. 4. Donate to school! Be sure to donate to your school every day. You can do this once per day, and doing so enhances your fame with school. When you have achieved a lot of fame, you will move into school status. These rows only work like internal skills, because they promote your passive stat. Make sure you don't miss the day! 5. Catch all the blessings! This MMO style game is usually a group of scams for you, and a sword of shadows in no discount. You have many blessings to capture. Watch the top right-hand side of the screen- you see a group of event buttons would be. If a red fly mark is next to a button, this means you have something to claim. You can get stuff from the new gift (7 days login), bonus bonus Level reward, online pack), and event (daily login, daily online). Get them all! It's all for the sword of shadows. Keep the Quests complete, and you're on your way to victory! If you have any other suggestions or tricks to share, let us know in the comments below! Down!
